Ramdani

Software Engineer

Lombok - NTB - Indonesia
ramdaninformatika@gmail.com

SUMMARY

Experienced Software Engineer especially for the Backend with over 3 years of hands-on expertise in developing robust and scalable web applications. Proficient in crafting RESTful APIs, GraphQL, and gRPC architecture. I specialize in utilizing tech stacks such as PHP, Go, and Python to create efficient and innovative backend systems. With a keen eye for optimizing performance and enhancing user experiences, I am passionate about leveraging cutting-edge technologies to drive impactful solutions.

EXPERIENCE

PT Laku6 Online Indonesia, Jakarta *Fulltime - Backend Developer*

JANUARY 2023 - Now

Responsible for maintaining and optimizing internal products, leveraging PHP with the Symfony Framework, Go, and NestJS as the primary tech stacks. Actively contributed to company growth by developing new features, addressing bugs, and enhancing revenue streams.

PT Software Seni, Yogyakarta *Fulltime - Backend Developer*

MARCH 2020 - JANUARY 2023

Developed robust and scalable solutions primarily using PHP Laravel, architecting and implementing backend systems for diverse web applications, and showcased versatility by leveraging Go for microservices in dedicated client projects.

PUSTIK Universitas Mataram, Mataram *Internship - Full Stack Developer*

MAY 2019 - DECEMBER 2019

Spearheaded the development of several dynamic websites aimed at enhancing the academic experience for students and employees.

ITEC Mataram, Mataram *Freelance - Backend Developer*

DECEMBER 2018 - DECEMBER 2019

Collaborate with the Company to develop and maintain APIs pivotal for Academic Information Systems using Python Django, fostering seamless integration with frontend and mobile platforms.

Universitas Mataram, Mataram *Contracts - Software Engineer*

MAY 2019 - OKTOBER 2019

Engaging in applied research within the Informatics Engineering department to develop bot applications using Python aimed to streamline the distribution of announcements and both academic and personal information.

Dinas Perumahan dan Permukiman Kab. Lombok Barat, Gerung
Freelance - Software Engineer

MAY 2019 - AUGUST 2019

Design and build a desktop application with Java for population slum data collection, featuring a robust Decision Support System with user-friendly UI/UX and facilitating decision-making on priorities for handling slum areas.
